REACTIVITY INFORMATION

Instability: This material is considered stable, however, avoid temperatures above 177C/350F, the onset of polymer decomposition. Thermal decomposition is dependent on time and temperature. Hazardous Decomposition Products: Thermal decomposition may yield acrylic monomers. Hazardous Polymerization: Product will not undergo polymerization.
Incompatibility: There are no known materials which are incompatible with this product.

HEALTH EFFECTS FROM OVER EXPOSURE

Primary Routes of Exposure: **Inhalation - Eye Contact - Skin Contact**
Inhalation: inhalation of vapor or mist can cause the following:
headache - nausea - Irritation of nose, throat and lung
Eye Contact: Direct contact with material can cause a slight irritation
Skin Contact: Prolonged or repeated skin contact can cause a. slight skin Irritation

TOXICITY INFORMATION

Acute Data: The information shown in the **HEALTH EFFECTS FROM OVEREXPOSURE** Section is based on the toxicity profiles for a number of acrylic emulsions that are compositionally similar to this product Typical data are:

Human:
Oral LD50 - rat; >5000 mg/kg
Dermal LD50 - rabbit: >5000 mg/kg
Skin irritation - rabbit: practically non-irritating
Eye irritation - rabbit: Inconsequential irritation
The aquatic 7-day LC50 for daphnids* was greater than 800 mg/L.
The aquatic 7-day LC50 for trout was greater than 1000 mg/L.
pH value 8.6
BOD value 4940 mg/l.
COD value 952,000 mg/L

* invertebrate species

The LC50 values are approximately 10-fold higher than the EPA's lowest toxicity criteria, thus results obtained for Enviroseal Duraseal are approximately 10-fold less toxic than materials which minimally meet the 100 mg/L, "practically non-toxic", criteria established by the EPA. The data are consistent with those for compositionally similar acrylic emulsions. The data do not suggest there is a concern for adverse environmental impact from proper use or even inadvertent misuse of Enviroseal Duraseal

SECTION VII - EMERGENCY FIRST AID PROCEDURES

Eye Contact: Wash affected area with fresh water for about 15 minutes, If irritation occurs, call physician.
Ingestion: if swallowed, give 2 glasses of fresh water to drink, consult a physician. Never give anything by mouth to an unconscious person.
Skin Contact: Wash affected area with soap and water.
Inhalation: Move patient to fresh air.

SECTION VIII - SPECIAL PROTECTION INFORMATION

NOTE: Safe handling of any chemical is always recommended, the following procedures are recommended for this product as well.

Respiratory Protection: Approved NIOSH respirator
Ventilation: Fresh Air
Protective Gloves: Rubber, may be cleaned by washing off with mild soap & water
Eye Protection: Splash goggles; see section VII for skin / ingestion information
Other Protective: Rinse product out of standard work clothes
Clothing or Equipment: with water, alternatively use rubber apron or plastic suit.

SECTION IX - SPECIAL PRECAUTIONS AND SPILL / LEAK PROCEDURES

Precautions to be Taken in Handling: Keep drums tightly capped
Precautions to be taken in Storage: Keep at moderate temperature. below 150 f / 65 c,
In Case of Accidental Spillage: Flush spill area with plenty of water
